in Abdallah Goher   ⌂ Abdogoher

Summary

Front-End Developer with hands-on experience building responsive and user-friendly web interfaces using HTML, CSS, JavaScript, and modern frameworks like React.js and Next.js. . Skilled in styling libraries such as Bootstrap and Tailwind CSS, with a strong focus on clean UI design and component reusability. Proficient in GitHub workflows and collaborative development. Passionate about creating scalable front-end solutions and continuously improving user experience through performance optimization and design thinking.

Skills

Languages: HTML 5, CSS 3, JavaScript

Technologies: React.js, Next.js, Tailwind CSS , Bootstrap ,Git & GitHub ,

State Management: Redux , Redux Toolkit, React Context API, useState / useReducer

Experience

Student in SEF Academy

from 5/2024 to 9/2024

- Mastered HTML5 and CSS3 to build responsive layouts and clean designs using Flexbox and Grid.
- Gained deep understanding of JavaScript, including Object-Oriented Programming (OOP) and DOM manipulation.
- Built interactive applications with React.js, managing state using useState and Redux Toolkit.
- Developed projects like an e-commerce store and a to-do list using modern front-end technologies and local data storage.

Trainee at Web Masters

from 8/2025 to 9/2025

- Refactored native code into modern UI frameworks to improve scalability and maintainability.
- Trained on building React-based projects with reusable components and dynamic state management.
- Learned modern JavaScript features including ES6+, async/await, and modular architecture.
- Collaborated effectively within team environments using GitHub workflows and clear communication.
- Built complete front-end projects using Next.js with routing, API integration, and responsive design.

Projects

E-Commerce

https://github.com/Abdogoher/E-commerce-full.git

- Developed a fully responsive front-end e-commerce application featuring dynamic product categories,user authentication, and a responsive shopping cart system , real-time search, and an interactive shopping cart. Integrated external APIs to fetch product data . The UI supports category-based filtering, pagination, and reusable components for scalable architecture. Designed with a focus on clean layout, user experience, and modular code structure.
- Tools Used: Tailwind Css, Next.js, Redux Toolkit

koshari-eltahrir

https://github.com/Abdogoher/koshari-eltahrir.git

- Developed a responsive front-end web application for "Koshary El Tahrir," showcasing a dynamic digital menu

with categorized dishes, prices, and images. mobile-friendly experience. Integrated external libraries for routing, animations. and includes a cart preview for selected items. Designed with scalability in mind to support future features like ordering and user login.

- Tools Used: React.js , Tailwind Css ,React bits

Movies

https://github.com/Abdogoher/Movies.git

- A responsive movie app built with React, Bootstrap, and JavaScript that allows users to browse, search, and view detailed information about films. Designed with a clean UI and dynamic components for smooth user interaction across all devices
- Tools Used: React.js , bootstrap , javascript

To Do List   https://github.com/Abdogoher/ToDo-List.git

- Built a lightweight To-Do List application using pure HTML, CSS, and JavaScript. The app allows users to add, delete, and mark tasks as completed, with all data stored locally using **LocalStorage** to preserve tasks across browser sessions.
- Tools Used: Css, HTML , Javascript

Education

Health Technical Institute   *Sept 2019 – May 2017*
BS in Medical equipment maintenance

- Grade: 90.41 - Excellent
